GrCF2 W2 Khmelnytskyi Solid Waste Project – EBRD Operation No. 50729

<https://www.ebrd.com/home/work-with-us/projects/psd/50729.html>

Project Overview

The City of Khmelnytskyi and KCE "Spetskomuntrans" are implementing a comprehensive municipal solid waste modernization project in partnership with the European Bank for Reconstruction and Development (EBRD). The project addresses the environmental risks posed by a 60-year-old landfill serving approximately 300,000 residents and managing around 100,000 tons of waste annually.

Key Components

- Closure and rehabilitation of the existing non-engineered landfill
- Construction of two new EU-compliant sanitary landfill cells
- Material Recovery Facility (MRF) and composting facility
- Expansion of source-separation systems
- Development of neighborhood Waste Management Centers

Recent Updates (2024–2025)

- Leachate Treatment Plant (capacity 200 m³/day) entered test operation on March 5, 2025. Implemented by ARIONEX LT and Rotreat Abwasserreinigung GmbH. Total value: €2.43 million.
- MRF & Composting Facility retender announced May 2, 2025. Evaluation stage ongoing.
- Landfill rehabilitation and construction of new cells (€11.39 million, including €5.05 million grant) – works ongoing.

Operational Achievements

- Landfill gas extraction and electricity generation (since 2018)
- Ecobus hazardous waste collection system (since 2018)
- Two Waste Management Centers operating; third under preparation
- Waste Management Training Center "Gufi Center" (opened 2021)

Impact

The project establishes a modern, EU-aligned waste management system ensuring long-term environmental safety, increased recycling rates, reduced greenhouse gas emissions, and sustainable disposal capacity for Khmelnytskyi.
